TECHNICAL INFORMATION

The 2xHD Fusion Mastering System: In the constant evolution of its proprietary mastering process, 2xHD has progressed to a new phase called 2xHD FUSION, integrating the finest analog, with state-of-the-art digital technology.

The mastering chain consists of a selection of high-end vacuum tube equipment. For the recordings on this album, the original 88/24 master was played on a Nagra HD DAC X high-end tube playback converter, wired with OCC silver cables to the 2xHD analog mastering electronic tube system permitting 2xHD FUSION to obtain a better resolution and 3D imaging.

The resulting signal is then transferred back into high resolution formats by recording it in DXD using a custom 2xHD Technologies A to D converter. All analog and digital cables that are used are state-of-the-art Siltech. The 2xHD FUSION mastering system is powered by a super capacitor power supply, using a new technology that lowers the digital noise found in the lowest level of the spectrum.
