Gabor Varga
piano

This recording is a silhouette, a reflection. The projection of all that, was filtered through by myself between the universe and the music. The beginning of the recognition between the quantum and the infinite. Sounds, that interweave at the endless inner and outer rim. The lasting impressions of feelings and moments.

A series of non-reproducible improvisations. It's an inverted pyramid, which is built from the point of origin into the direction of the spectrum. Acknowledgements.
