This recording is a mirror that you should not look in, but listen to.
And if you really pay attention, you can hear what we felt in Budapest on
Saturday afternoon, October 20, 2018 in Hungary.

You can hear how much we enjoyed the freedom of improvisation, how we
had a "conversation" with our instruments. Maybe you can even hear how
we felt, but you will certainly hear one thing - how much we love music.

Use this mirror carefree. No matter how you listen to this mirror, you will
hear four happy musicians in this recording over and over again.
We wish you a pleasant time.
