JERRY GRANELLI V16

THE SONIC TEMPLE MONDAY AND TUESDAY

This band is like a chemical reaction, whenever we get together or whatever music we approach just seems to turn into this wonderful sonic adventure always on the edge, and always in this wonderful world of nowness.

This music was recorded live with no editing. The audience was great, and in a live performance there's a natural exchange of energy; I hope that is captured on these CDs and you can share it. So enjoy the ride....
